### 7. Disclaimer

Color Library will do its best to fulfill client satisfaction, but is not responsible for the end results. In some case, manual adjustments on the levels of the image will be necessary to achieve better results. In any case, we strongly advice to print a wet proof with the correct paper, halftones, and ink density in order to obtain an accurate preview of the final printed results. If you are not comfortable with color conversion and adjustments, we provide extra services for that: [Conversion and Production Monitoring](#).
